DYN HP P48
QUICK GUIDE V1

QUICK START

INSTALLATION

Use the provided GREEN PUTTY to install the pickup on the instrument: with a little piece of putty, form a ball of approximately 8 mm; “work” the ball to shape a “worm” of about 6 cm and close a ring to fit the bottom side of the microphone; fit the DYN on the instrument by pressing it firmly.

When the microphone has been correctly installed, you will feel that the center spot is making contact with the instrument.

CONNECTION

Just like any condenser microphone, connect the DYN HP P48 to a mic channel of an acoustic amp, preamp or mixer.

DYN HP P48 microphones require phantom power to work, so remember to activate it once the pickup is plugged in.

If needed, the cable length can be extended using a common XLR microphone cable.
